```java
1 package javapractice;
2
3 class Final1{
4  public void final_method1() {
5   System.out.println("This is final1 method");
6  }
7 }
8
9 class Final2 extends Final1{
10  public void final_method2() {
11   System.out.println("This is final2 method");
12  }
13 }
14
15 public class final_keyword {
16  public static void main(String[] args) {
17   final int a=100;
18   //a=200;
19   System.out.println("A value:"+a);
20   Final2 f=new Final2();
21   f.final_method1();
22   f.final_method2();
23  }
24 }
25
```
