```java
1 package javapractice;
2 class Flower1{
3  private String flower_name;
4  private String flower_color;
5
6  Flower1(String flower_name,String flower_color){
7   this.flower_name=flower_name;
8   this.flower_color=flower_color;
9   System.out.println("Flower name is : "+flower_name);
10  System.out.println("Flower color is : "+flower_color);
11 }
12
13 public void flower_method() {
14  System.out.println("Flower name using method:
15  System.out.println("Flower color using method:
16 }
17 }
18
19 public class flower {
20 public static void main(String[] args) {
21  Flower1 obj=new Flower1("Rose","red");
22  obj.flower_method();
23 }
24
25 }
26
```
